

MOBILE SECURITY TOWERS

Prevent Theft Before It Happens

Portable, self-powered towers with AI detection and live operators. No trenching and no wiring.

WE'RE DIFFERENT

**We don't just record.
We respond.**

Most mobile tower providers offer cameras that only record incidents. Scutum Digital delivers a fully monitored, actively managed system that detects, verifies and stops them in real time.

A live voice-down warning through the tower speakers. Most intruders leave on the spot.

- ✓ Dedicated monitoring specialists, not a call center
- ✓ Proven enterprise deployments nationwide
- ✓ AI detection plus SOP-driven human response
- ✓ Works alongside your guards and site teams
- ✓ Approved vendor with multiple insurance providers

LIVE
MONITORING

HOW IT WORKS

Detect. Verify. Stop it.

AI detection combined with trained operators, so every event is handled in real time.

AI detects activity

Analytics scan the full site for suspicious behavior, day and night.

An operator verifies instantly

A trained monitoring specialist, not a call center, checks the event live.

Live voice-down warning

Through the tower speakers. Most intruders leave on the spot.

Guards or police dispatched

If the threat continues, we escalate immediately.

Full incident report

Documented for investigations and insurance claims.

WHY MOBILE TOWERS

Security that deploys in days, not months.

Cost-effective

A fraction of the cost of 24/7 guards

No overtime, turnover or gaps in coverage

Monthly service, no upfront cost

Rapid deployment

No trenching or wiring required

Solar-powered with battery backup

Operational within days

Built for real conditions

4K cameras with day and night visibility

All-weather construction

Scales across multiple locations

AT A GLANCE

Tower specifications

Rapid deployment. Intelligent monitoring.
Immediate deterrence.
